

LEARNING SKILLS

Quest Forward Learning

EXPLORE

Establish Meaning

Use prior and new knowledge and tools to understand what is happening or being said.

Ask Questions

Compose questions based on observations, readings, or problems.

Investigate

Use multiple methods to inquire, gather information, and establish context.

ANALYZE

Interpret

Use sources, data, or computations to extract meaning.

Identify Patterns

Find similarities and draw connections among events, ideas, and representations.

Be Creative

Create solutions, new ideas, and new methods.

REASON

Assess Arguments

Evaluate arguments, points of view, and positions with attention to evidence and reasoning.

Take a Position

Develop your own position. Support it with appropriate evidence and reasons and defend it from the criticism of others.

Reflect

Reflect upon actions and experiences, recognize strengths and shortcomings, and identify ways to improve.

COMMUNICATE

Collaborate

Participate in group work, and give and receive peer feedback.

Compose

Design and produce works that connect ideas and demonstrate knowledge. Revise work to make it better.

Share

Connect with the audience and communicate work clearly.
