

# Preparing Students To Succeed In The World Ahead

The world is constantly changing, and today's students face challenges driven by global forces that include the rise of artificial intelligence, climate change, a new space age, politics at home and abroad, and more. But these challenges also create opportunities that will reward creative problem solving, leadership, and vision.

To prepare for the future, students need to graduate from high school with the skills to build purposeful lives and careers. Learning how to learn, how to ask the right questions, how to solve problems, and how to grow as an individual through setbacks and successes are essential life skills.

Mastering these skills is the goal for students at Quest Forward High School (QFHS) Omaha. We encourage students to take ownership of their learning, commit to growth, and prepare for a purpose-driven life. As part of that process, we help students forge their own paths through their high school years and into their chosen careers.

## College Preparation

Our rigorous College Admission Advantage program thoroughly prepares students for the challenges they'll face in college and beyond. All students engage in regular college and career exploration workshops, and can earn college credits via dual enrollment opportunities with local colleges. They also receive individualized support, test preparation, and mentoring as they discover and determine the best path for their future college success.

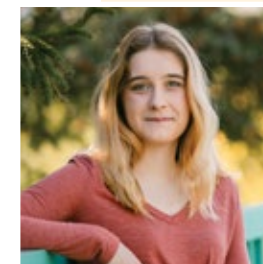

## Pathways Program

Our Pathways Program prepares students for life after high school. Students explore a variety of career pathways, learn how to communicate professionally, and practice managing personal finances. As part of this program, they also gain an in-depth understanding of a wide range of digital tools and techniques, and their related industries. Students explore digital creativity ranging from design and presentation in Adobe Suite, AI and enhanced software such as ChatGPT, coding programming languages, digital design and 3D printing, sound engineering, animation, and more. Students apply these skills directly through internships, project work within courses, and by developing a digital portfolio that showcases their achievements.

## Service Leadership

We're committed to instilling empathy, understanding, personal development, and civic engagement in all of our students. Students participate in service leadership opportunities that encourage them to be active members of their communities. These experiences stand out on their resumes and transcripts, and help them grow in competence and confidence.

“ QFHS didn't have the math class I wanted to take, so they made it for me. When choosing a career, I wanted something that combined my love of math and science. Bioengineering and biomechanics made that mesh and it has been really fulfilling. ”

**Libby, QFHS Graduate and University of Omaha Student**

## The Quest Forward Advantage

Quest Forward High Schools provide students with the skills they'll need to succeed in college, career, and life.

It is our core belief that students learn best when they are active and engaged in the learning process, motivated by the ability to choose and make decisions, and provided with effective feedback. Everything we do builds on this foundational belief to help students become engaged, committed learners.
